Responsible-Design@Grenoble an international semester project

February 1st 2010 - June 4th 2010

Responsible-Design@Grenoble is a full-semester project in which international student teams have to design innovative concepts of responsible products to respond to industrial challenges.

Our objective is to propose innovation that includes social and environmental issues:

- User Centered Design
- Sustainable Design
- Inclusive Design
- Ethics & Responsibility

Joint seminars

- Responsible design seminar
- Business seminar
- French language and culture courses

Requirements

- The program is open to students with a solid academic background in engineering: 1st Year of Master's degree of European Bologna process.
- English Speaking.
