

Project Manager (or Post-Doc Position) Skills and Knowledge in Industry 5.0

The Industrial Chair “Industry 4.H”, managed jointly by the Grenoble INP Foundation, Grenoble INP – Génie industriel, and Grenoble IAE, has the mission of educating engineers and technicians shaping human-centric, sustainable and resilient manufacturing environments, as well as re- and upskilling operators to fill current and emerging job roles in modern manufacturing environments.

You will be the coordinator and key contributor to this chair program, with the following main activities:

- 1) Develop the training curricula and the necessary teaching materials
 - a) Contribute to research on the skills needed for Industry 5.0
 - b) Interview industrialists
 - c) Develop the required training courses and modules with the concerned teachers
 - d) Set up and carry out pilot trainings

- 2) Animate the community of the chair
 - a) Industrialists
 - b) Trainers
 - c) European university partners

- 3) Manage the project
 - a) Committee meetings
 - b) Project reporting
 - c) Deliverables creation

You will work in close collaboration with the chairholder, researchers from G-SCOP (Industrial Engineering) and CERAG (HR Management) and teachers from Industrial Engineering and IAE. You will have the opportunity to publish in scientific journals and conferences.

Required profile:

- Engineer with a vision of manufacturing
- HR management with a desire to specialize in the manufacturing field
- Educational sciences with a desire to specialize in the manufacturing field
- Experience in European projects is a plus
